About Pop Rivets

Fasten joints without access to reverse side. Insert rivets - the retracting jaws in the setting tool pull the mandrel head into the rivet body on the reverse side until the mandrel breaks. The high clinch action pulls the parts together for a tight, vibration-proof fastening.

Coloured / Painted Rivets

Some rivet bodies are enameled Black, White or other colours like Olive, just call and ask us if the rivet size you want comes in the colour you want.

Examples of Rivet Partnumbers

Add the rivet materials abbreviation to the front of the rivet size/type number to get the rivet's part-number.

Aluminum Body / Aluminum Mandrel

ABA42 = 1/8" dia. x 1/16 – 1/8" Grip Range

ABS610 = 3/16 dia. x 1/2 – 5/8" Grip Range
