

Translucent Panel Premium Panel Sealant Compatibility Chart

Tube Sealants: DMI and Palram suggest that only Neutral Cure pure silicone tube sealants be used with our polycarbonate panels. Palram no longer tests the compatibility of these materials as a service to our customers and will not be liable for the end results when using sealants in actual product applications. For additional information with regards to actual performance of a specific sealant when used with polycarbonate, please contact the manufacturer of the sealant. Each user of the product should make his own test to determine the product's suitability for his own particular use including the suitability of environment condition for the product.

Tape Sealants:

DMI Butyl*Roll brand of butyl tape has been tested and has been approved as compatible with our Polycarbonate Panels. And is available in a multitude of sizes from the same distributors of our panels.
