

DURA CLAD™

PVC Interlocking Liner Panel

Overview

Duraclad™ interlocking wall and ceiling liner panels feature a multiwall structure that results in a high level of rigidity and strength, and allows for rapid installation. Interlocking tongue & groove edges permit fasteners to be completely hidden, resulting in a clean, smooth finish. Use it for interior cladding for all types of structures.

Duraclad's resistance to chemicals allows for frequent cleaning and sanitary maintenance, as well as extended service in harsh chemical environments.

From hog barns to dairy sheds, from poultry houses to wineries and more, Duraclad holds up where other products won't.

Smooth, bright white surface is chemical, mold, bacterial and water resistant.

Duraclad is stronger than other PVC liner panels with thicker inner walls.

Secure tongue and groove design with hidden fasteners for easy installation that allows for expansion and contraction.

Warranted for 20 years, and easy to maintain.

Stronger by Design.

Main Benefits

- Rapid tongue and groove installation
- Fasteners are completely hidden
- Easy to clean/sanitize smooth surface
- Waterproof, rust-proof
- Excellent chemical resistance
- Resists gasses and chemicals emitted by animal waste
- Excellent light reflectance
- Attractive high-gloss white finish
