

2025 STANDING SEAM COMPONENT CATALOG

LOW PROFILE HEAD FASTENERS FOR ATTACHMENT TO WOOD

PANCLIP - for applications that require a low profile head with large flat under head load bearing surface. The Panclip head combines a larger clamping surface than a PFH fastener and a lower profile than a HWH or hex head fastener. Designed primarily for the installation of standing seam metal roofing panel clips. The Panclip has many other applications such as window, door, fixture, liner panel, cladding and siding panel installations. Panclip fasteners are now available for wood (MTW), steel (MTM) or wood to metal (WTM) applications.

#10 PANCLIP MTW 1000 HR MIAMI-DADE

DMI's "standard" fastener for low profile fastening applications to wood substrates. This engineered multipurpose fastener is a carbon steel fastener with E zinc galvanizing and DMG85 corrosion resistant coating. This fastener meets exceeds the ASTM G85 Miami-Dade corrosion resistance requirement and the Silver parts have a Miami-Dade fastener listing L 21-0630.02. This fastener also meets the Florida Building Code, 2017 FBC R904.5.2, 2014 1505.5 1000 hr ASTM B-1117 requirements. The #10-9 thread pattern performs well in plywood and OSB substrates. All Panclip MTW screws feature #2 square drive and a TP-17 point and are packaged 250 pcs per bag.

PANCLIP SP MTW - 1000 HR COATED

Panclip fastener designed for clip installation into dimensional lumber wood substrates. Full Silver DMG85 coating and sharp point. Meets FBC 1506.6 and Miami Dade requirements. Available in older 11 TPI and 13 TPI design thread patterns specified in some approved systems more specifically suitable for dimensional lumber substrates. Packaged 250 pcs / bag

With extra low profile pancake wafer head for installing nail strip style standing seam panels into wood substrates. XLP MTW comes standard with DMG85 Silver corrosion resistant coating designed to exceed Florida Building Code and Miami-Dade County requirements. The XLP's larger #12-8 diameter provides superior holding strength vs. competing #10 fasteners into wood substrates. The XLP has a sharp point and #2 Square drive for ease of installation.

The #12-8 and #10-13 are available in both coated carbon steel and coated 304 stainless steel. A most economical Zinc plated only option was added for 2025 for use outside of code restricted areas, offering a PH2/SQ Drive. All XLP fasteners are packaged 250 pieces per bag.

PANCLIP-SD-L LONG LENGTH PANCAKE HEAD

#14-13 fastener low profile head fastener designed for applications that require a high strength fastener available in long lengths. Popular for many applications: Panel clip/ **Commercial Roofing** Stress Plate/Plywood/ Nailboard/ commercial/ Fixture attachment and more...

The multi-purpose nature of the Panclip SDL allows it to be installed into wood. light gauge metal up to 16ga and masonry/ concrete substrates with a 3/16" pre-drill.

Available in Steel or 410 Stainless Steel variants, both with the DMG85 ceramic barrier coating for optimum corrosion and dissimilar metal reaction resistance.

PANCLIP SD. PAN*CON LOW PROFILE FASTENERS FOR STEEL OR MASONRY

PANCLIP-SD for applications to that require a low profile head with large flat under head load bearing surface. The Panclip head combines a larger clamping surface than a PFH fastener and a lower profile than a HWH or hex head fastener. Designed primarily for the installation of standing seam metal roofing panel clips and commercial roofing stress and seam plates. The Panclip also has many other applications such as window, door, fixture, liner panel, cladding and siding panel installations.

PANCLIP-SD SELF **DRILLING MTM**

Panclip low profile pancake head mated to a self drilling drill point for drill and tap performance into metal and steel substrates.PANCLIP-SD features the 1000hr DMG85 ceramic coating over both the zinc plated C1022 and 410 Stainless Steel parts. This barrier coating provides resistance to corrosion and dissimilar metal reactions. DMI headmarkings signify C1022 DMG85 fasteners while a DMI4 head marking signifys 410 Stainless steel with the DMG85 Coating. Most sizes come bulk in the box.

PAN*CON SS -MASONRY

410 Stainless Steel Panclip low profile head fastener designed for installation into predrilled masonry, concrete or wood.

Popular for window, door, roofing panel clip, Duraclad PVC panel and flashing details to concrete substrates. Also popular for use as a removable termination bar anchor into parapet wall applications. The full 410 stainless steel construction with DMG85 Silver corrosion resistant coating exceeds ASTM B117 and FBC 1506.6 standards.

Packaged in 100 piece boxes with a drill bit included.

SNAP LOCK STANDING SEAM METAL PANEL CLIPS

SNAPLOCK PANEL CLIPS

Designed for secure fastening of snap lock style standing seam/concealed fastener metal roofing systems. All DMI panel clips are designed to meet FBC 1506.7 corrosion resistance requirement. Panel clips can be manufactured to fit panels from most brands and styles of roll forming machines. Please specify make and model of machine when ordering. Most styles are designed with built-in fastener relief to help eliminate panel dimpling.

MECHANICAL LOCK STANDING SEAM FIXED METAL PANEL CLIPS

MECHANICAL LOCK FIXED PANEL CLIPS

Designed for secure fastening of mechanical lock style standing seam / concealed fastener metal roofing systems. All DMI panel clips are designed to meet FBC 1506.7 corrosion resistance requirement. Panel clips can be manufactured to fit panels from most brands and styles of roll forming machines. Please specify make and model of machine when ordering. Most styles are engineered to give fastener relief, and heights of clips are listed in panel height. 1" tall panel would use 1-1/8" tall clip, 1-1/2" panel would use 1-5/8" clip, etc.

EXPANSION CLIPS FOR MECHANICAL LOCK PANEL CLIPS

Designed to allow for thermal expansion while providing secure fastening of mechanical lock style standing seam / concealed fastener metal roofing systems. The expansion style clips are available in 3 different styles; one piece pre -assembled style, a two piece job site assembled and a butterfly style two piece job site assembled. All panel clips are designed to meet FBC 1506.7 corrosion resistance requirements.

DOME HEAD BLIND RIVETS Blind rivets fasten joints without access to the reverse side of the sheet metal. DMI stainless steel rivets are manufactured of corrosion resistant 304 stainless steel. DMI SS rivets exceed the corrosion resistant standards put forth in Florida Building Code section 1506.6. DMI also offers un -painted rivets in 304 stainless steel, 316 stainless steel, aluminum and copper/brass. Rivet length is measured to the end of the rivet body. Some DMI2L1290V (CCC)100 series rivets are painted on the "business end" on the head only so that once installed only the painted portion is exposed, some colors are dip painted which covers the business end" and the unseen portion on the rivet.

V100 series painted rivets come packaged in card hanger packaging suitable for peg board stocking.

BUTYL SEALANT TAPES **MEMBRANE ROLLS**

Butyl*Roll PREMIUM BUTYL TAPE SEALANT ROLL

Designed for sealing and preventing the entry of moisture, air and dust into metal lap joints, Butyl*Roll has expanded to serve a wide range of applications. Unlike tube sealants, Butyl*Roll provides a consistent shaped bead, and is quick and easy to apply. Meets or exceeds the following specifications: MIL-C-18959B TIICB, TT-C-1996A TIICB, AAMA 904.3-92 and AAMA 807.3-92 and is Made in the U.S.A.

ADVANTAGES:

A premium quality sealant roll made of 100% solids, highly rubbery, sticky and easy to apply. It shows excellent performance over a wide range of temperatures and conditions. Excellent adhesion to Galvalume and Kynar 500, non-staining and permanently flexible. Butyl*Roll is mold and mildew resistant. Unlike many of the competitors Butyl*Roll is Approved for use on Polycarbonate Panels.

Stock Sizes Qty/Box Part# Representation of profile Single bead styles 3/32 x 3/8" x 45' 40 DMBT3323845 3/32 x 1/2" x 45' 32 DMBT3321245 3/32 x 3/4" x 45' DMBT3323445 24 3/32 x 1" x 45' 20 DMBT332145 1/8" x 1" x 45' 14 DMBT18150 1/8" x 2" x 50' 4 DMBT18250 Double bead styles 3/16 x 7/8" x 40' 10 DMBT31678D Triple bead styles 3/16 x 7/8" x 25' 14 DMBT31678M 3/16 x 2-1/2" x 20" 6 DMBT3162122

BT-13 BUTYL TAPE SEALANT ROLL

BT-13 / Butyl*Roll TP-13 is the second DMI formularization of elastomeric butyl tape formulated for use in the metal building industry. BT-13 is a non-drying compound that does not stain and remains permanently flexible. In addition to providing superb adhesion to a variety of substrates, this material also prevents or reduces galvanic corrosion, electrolysis, noise transmission, and thermal transfer vibration, BT-13 is different than standard Butvl*Roll in that is offers more 3/32" x 3/4" x 45' 200% more elongation and a slightly stringier consistency. BT-13 is not approved for use on Polycarbonate Panels.

ADVANTAGES:

BT-13 is mold and mildew resistant. Service Temp -40degF to 180 degF ASTM D412 Elongation 1000% 18 month shelf life. Made in the U.S.A.

DMI T3 ECONO BUTYL TAPE - BLACK TAPE

T3 Econo butyl tape is the 3rd formularization of elastomeric butyl tape formulated specifically for use in the HVAC, curtain wall & sheet metal industry. This tap has more fillers that typical Butyl*Roll tapes allowing it to be our price leader. The color is black

ADVANTAGES:

Low cost, American Made

Service Temp –40degF to 180 degF, Tensile Strength 12-14 PSI, Shelf Life 2 yrs. ASTM D412 Elongation 600%, Odorless.

USA

DMI30 SSR SEALANT NON-SKINNING STANDING SEAM SEALANT

DMI30 is a non-hardening, self-healing sealant that provides superb adhesion in all conditions; including extreme temperatures and moisture levels. DMI30 does not string during application, and exhibits outstanding webbing and cutoff characteristics. DMI30 is intended for concealed application away from sunlight. This material remains permanently tacky and flexible after curing, and provides a long lasting and resilient seal. Packaging: (30) 10.1oz plastic tubes / case, Part# N104001TDMI

Product Uses: DMI30 adheres to a wide variety of substrates, and as such serves as a trusted sealant in a multitude of markets. In the metal building industry, DMI30 is often used as a standing seam sealer. It adheres to painted metals, Zincalume, Galvalume, and Kynar 500. DMI30 is also used as a joint sealant in foam glass applications. Not for applications that expose the sealant to sunlight.

PIPE & CONDUIT FLASHINGS FOR METAL ROOFING

DML2HT

DMI PIPE FLASHINGS FOR METAL ROOFING - UNIVERSAL ROUND BASE Used to waterproof roof penetrations in metal roofing panels. Made of pliable rubber with a 20 year limited warranty. Our flashings feature an aluminum fastening ring with grooved sealant holding base that is adjustable to most common roof pitches. These parts are 100% North American Made. The #3 pipe flashings have a UPC Approval and Florida Building Code.

#3 COLORS PIPE FLASHINGS FOR METAL ROOFING

Now available in 14 colors to complement popular metal roofing panel color choices. Used to waterproof roof penetrations in metal roofing panels. Made of pliable rubber with a 20 year limited warranty. Our flashings feature an aluminum fastening ring with grooved sealant holding base that is adjustable to most common roof pitches. The #3 fit pipes 1/4" up to 5" in diameter and have an 8" round base. These pipe flashings have a UPC Approval and Florida Building Code Approval.

DMI SQUARE BASE RETROFIT FLASHINGS

Designed to waterproof electrical conduit, masts, service poles and collared pipe penetrations through metal roofing panels. Includes corrosion resistant band and rivets for fastening. Accurate side markings make it easy to cut for a specific size. Light gray, square base E.P.D.M. rubber construction with UPC approval and 20 year warranty. Standard color is gray, however these parts are available by special order in black E.P.D.M. or red high temp silicone. 100% North American Made. FL 28400.3 R1

DMI ROUND RETROFIT FLASHINGS - (Zipperboot)

Designed to waterproof electrical conduit, masts, service poles and collared pipe penetrations through metal roofing panels. Stainless steel fastening teeth interlock with the rubber for fastening at the split. E.P.D.M. rubber construction with UPC approval and 20 year warranty. Standard gray to be used on mill finish metal roofing. #802 are available for special order in black EPDM or a white high temperature silicone.

SIDE WALL FLASHING

This low profile flashing is available in standard or retrofit (as shown). This is designed to flash in pipe or wire penetrations in metal sidewall penetrations. Available in Gray or Black EPDM in standard and white silicone in a high temperature retrofit version.

Packaged 10 pcs/box Special order / Made to order.

MULTI-FLASH SQUARE VENT SQUARE PIPE BOOT

Fits standard square pipes and vents from 3/4" to 5" and retrofit applications for 1-1/2" up to 4". High quality black E.P.D.M. with 20 year warranty. Adaptable base and no hassle stainless steel gripper to secure in retrofit applications. Square base.

Packaged 10 pcs/box Part# DMLMFSQ101BA

CAP FLASHINGS MASTERCAP & RIBCAP

Designed to seal up-slope profile ends. Popular applications such as: HVAC curb penetrations, skylight curb penetrations and chimney flashing points.

The MASTERCAP1 measures 3" high x inner Depth of 2" and Base width of 4-1/2" will accommodate many standing seam metal roofing profiles from 1-1/4" to 3" and popular commercial roofing panels with an 1-1/4" to 2" tall rib such as MR12 / R Panel / PBR Panel. (Old Part#DSLMC101BA/GA, DMLMC051/MC101NG) **** New Part number and packaging, Packaged 20 pcs per box Gray part# MC101BA

THE RIBCAP is designed specifically for 3/4" rib profile ends. Packaged 10 pcs per box Part# DMRIBCAPSize: 3/4" overall height x inner wall width 2" inner depth of 2-3/4".

LIGHTNING ROD PIPE FLASHING

Designed to weatherproof lightning rod or wire penetrations through metal roofing panels or ridge caps. Easy to use, with the perfect low profile design. Also used in some solar stand applications on metal roofing. Packaged 40 pieces per box. Imported. Fits 0" to 1-3/8" Part# DM1RRG

END CAP FLASHING

Constructed of gray E.P.D.M. with a 20 year warranty. Applications include skylight, cupola and ridge ends. Flexible, corrosion resistant aluminum base conforms large standing seam and trapezoidal metal roof panels. Imported.

Part# DM1DC1

FIX-A-FLASH MASTERFLASH

Solution for smaller pipes with an oversized hole in your metal panel, and solution for overflash application of old pipe flashings. E.P.D.M. Black 20yr warranty rubber and adaptable base. Fits 0" to 15" pipes with a 19-1/2" base. Buy American Plan.

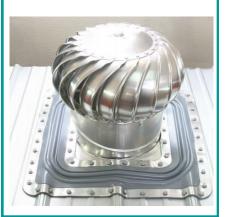

5 pcs per box Part# FF851BC

MR VENT-FLASH

Designed to flash turbine vents, roof exhaust fans and goose neck vents. Inside opening 11.75" x 11.75" outside base is 24" x 24". Adaptable base designed to mold to most panel configurations and roof pitches. Made of UV protected EPDM that has an application temperate range up to 212 degF. Standard parts are gray.

Packaged 1/box, Part# DMLVFLG24

Gray E.P.D.M.

10 pcs per box

MULTI-PORT MASTER FLASH[™]

Easy to use 4 in 1 flashing, up to 4 cables or wires per flashing. Stainless steel gripper to secure in retrofit applications. Accommodates four 1/4" lines and 1 pipe 1/4" - 2-3/4". B.A.P.

Black E.P.D.M. 10/box DMLMP101BA

Red high temp 10/boxDMLMP102RA

CLOSURES & RIDGE VENT SYSTEMS DIRECT*SEAL LONG LIFE UNIVERSAL CLOSURE ROLLS

Universal closure rolls designed to seal gaps in metal roofing, window and door installations. When compressed, Direct*Seal will become a water, pest, wind, and dust barrier in valley, hip and other panel to panel or panel to trim applications. Direct*Seal can also be used to close in gaps around windows and doors to help increase the energy efficiency of your building. Direct*Seal comes fully expanded in a single wrapped roll and is compressed at time of application.

Application Guide: Compression of the product is required to achieve the following: 25% Compression required for dust & sound protection, pest resistance and thermal insulation. 50% Compression required for wind, air and rain protection up to 20 psf.

Advantages:

- UV protected foam with no asphalt content (non-streaking, non-staining)
- Designed for any pitch from 2/12 to 20/12
- Will not scratch panel finishes
- Easy to apply with a full width peel back adhesive strip

BG1 EXPANDING UNIVERSAL CLOSURE ROLLS

Precompressed, self-expanding polyurethane foam with acrylate dispersion impregnation. Used for sealing joints and seams in metal panels, gaps around door and window frames and expansion joints in buildings/construction. Ships in a compressed roll, expands to fill gaps between mechanically fixed panels and trim. Typical expansion occurs in 8-10 hours. Made in Europe.

Application Guide: Compression of the product is required to achieve the following: 20% Compression required for dust & sound protection, and thermal insulation 50% Compression required for wind, air, dust & sound resistance, and insulation 70% Compression required for rain protection up to 6.25 psf 80% Compression required for rain protection up to 21.57 psf

FILLERSTRIP DIE CUT CLOSURE STRIPS

Die cut foam closure strips with UV inhibitors. Designed to fit popular profiles and close the gap between trims and panels. Each piece is cut to fit specific panel profiles and most are made to your panel width. Available with or without adhesive for an easy, quick, and accurate installation. Flat block rectangular shaped closure strips available to fit standing seam metal roofing panels.

Outside closures:

fit at the ridge line between the outside of the panel and the ridge cap. Inside closures: fit at the eve of the roof to seal the inside of the panel profile.

RAZORBACK RIDGE VENT PLUS

Long life universal ridge vent rolls for metal roofing panels. Quick and easy installation directly to ridge cap with full width positioning adhesive tape strip. Long term heat resistant coatings and flame retardants for extended product life. Full width adhesive designed for higher adhesion in cold climates. Made in the U.S.A. with all American Made components. This product has not been tested for Building Code Compliance, not for use in the State of Florida. Please allow a minimum of 25% compression on installation. Standard Razorback ridge vent is available with FBC testing approval #, inquire with your salesperson if desired.

Advantages include:

- Inexpensive, quick and easy to install
- 40 year limited warranty, with fire retardant longlife coatings
- Designed for many roof panel configurations and pitches from 2/12 to 20/12
- Low profile attractive installed appearance
- Does not scratch painted metal surfaces

STANDING SEAM HEMMING TOOLS

DOUBLE STAGE LOCKING SEAMER

2-in-1 locking seamer for standing seam roof applications. This tool combines the two stages of a double

lock seam into a single tool. Powder-coated Steel for

Hemming tools are designed to facilitate the quick and precise hemming of metal panel edges for standing seam roofs and can be used to close the high side of panels. Constructed from 10 ga steel and powder-coated for durability. Makes 1" or 1-1/2" bends in metal up to 10" wide, 1/8" throat gap allows use with up to 15 ga material.

DRIP EDGE AND VALLEY BENDERS

High leverage Drip Edge Benders are designed to make bends in metal panel edges. Two-handed bar handle design allows two handed use for extra leverage. Lightweight and can easily be used overhead on installed panels to bend up to 18ga material. Constructed from 14 ga steel and powder-coated for durability. Makes 1" or 1-1/2" bends in metal up to 10" wide, 2mm throat gap allows use with up to 18 ga material.

180Z TINNER'S HAMMER

The perfect hammer for light to medium duty jobs and works well for striking common and finishing nails. Forged single piece steel head and handle for unsurpassed strength and durability. Finely polished head creates a smooth surface. Bonded shock reduction grip reduces shock significantly and lowers hand and arm fatigue. Part # 04-880 6 per box, 18 per case.

16OZ CLAW HAMMER

Standard multi-purpose claw hammer with a forged steel head and fiberglass handle. Durable forged steel head. Super strong, ultra-light and antivibration fiberglass ergonomic handle. Sharp claw for precision and efficiency, ideal for masonry, walls, bricks and concrete. Part # 04-175

16OZ HICKORY SHINGLING HATCHET

Durable construction, lightweight and ergonomic handle design. High carbon steel head with hardened face, premium hickory handle with lacquered finished. Fixed blade and replaceable gauge, triple wedge construction and milled face. Premium hickory handle, flame and lacquer finish. Part # 04-442 1 per box, 24 per case.

HAMMERS' & HATCHETS

AVIATION SNIPS

Ideal snips for cutting light stock. High-quality chromevanadium alloy steel. Rubber comfort grip handles and safety latch. Non-slip serrated jaws for efficient cutting, spring action for fast, effortless feed. Standardized handle colors are easy to identify.

OFFSET LONG CUT AVIATION SNIPS

Offset snips with 3" blades ideal for long cuts. Ideal snips for cutting light stock. Rubber comfort grip handles and safety latch. Non-slip serrated jaws for efficient cutting, spring action for fast, effortless feed. Standardized handle colors are easy to identify.

OFFSET AVIATION SNIPS

Offset jaws to keep hands up and away from sharp metal edges. Ideal snips for cutting light stock. Rubber comfort grip handles and safety latch. Non-slip serrated jaws for efficient cutting, spring action for fast, effortless feed. Standardized handle colors are easy to identify.

VERTICLE OFFSET AVIATION SNIPS

Vertical offset ships ideal for increased reach in overhead projects, tight spaces or ground level cutting. Cut straight and left curves in 24 gauge cold-rolled steel and 28ga stainless steel. Offset blades keep hands safely away from material and provide increased reach in tight situations.

TINSNIPS

Ideal for cutting low carbon cold-rolled steel. Cut straight and wide curves when trimming light gauge stock. Cushion grip and hand-edged forged steel blades.

DRILL-OPERATED AVIATION SNIPS

Converts a power drill into aviation snips. Has applications in metal roofing, building panels, metal duct work and sheet metal. Comes as a complete kit, snip attachment, 1 nut, 3 screws, 2 drill clamps, 1 soft grip hand, 5mm and 10mm wrench.

MULTI-PURPOSE/MULTI FUNCTION SHEARS SCISSORS Shears are ideal for cutting sheet metal and leather, stainless steel serrated blade, lightweight and durable. Multi-Function Scissors are ideal for cutting sheet metal, polycarbonate, and plastic.

ALUMINUM & ALUMINUM COMPOUND SCISSORS Ideal for vinyl siding and can be used to cut sheet metal, roofing materials, plastic and canvas. Cuts straight right and left curves in up to 22 ga cold-rolled steel or .032 aluminum. 3" cutting length and multiple handle openings. Blue compound style has protruding blade for tighter cuts.

HAND RIVET GUN

Ideal for pulling blind rivets. Rubber grip handles, 4 size adjustments.

SNAP LOCK PUNCH

Makes tabs in the cut edge of a siding panel used as a finishing course. Punch impression spaced 3/8" for edge of metal. Non-slip vinyl cushion handle.

NOTES:

2025 Sales Policies and Conditions:

Direct Metals, Inc. has worked diligently to set up a distribution network including wholesale roofing supply locations, building products distributors, and OEM Manufacturers. As DMI is not set up for one time purchases or direct to market sales to the public, building owners, builders, contractors, installers or end users, we rely on this network to bring our products to market. Direct Metals, Inc. sells materials directly to our registered distributor network. We do not offer direct sales however we can assist you in finding the right product and your closest distributor.

Return Policy:

All DMI distributors have the right to set their own policies with their customers including but not limited to: return, re-stock, pricing and terms of sale. DMI policy to our distributors is that all sales are considered final (ALL SALES FINAL). No returns on sales older than 45 days, regardless of circumstance. Prior approval from Direct Metals, Inc management is required for any and all returns. If DMI management will accept a return, it must be a standard stock product returned in original un-opened packaging, with a non-negotiable restocking fee. Any painted or special order product sales are final, no returns. No returns on items 2' or larger in any dimension including translucent panels, termination bar, windows and doors. **Re-stocking fee is 25%** of the invoice amount, in addition to all shipping costs to send original shipment and return product to a Direct Metals, Inc service center. All credits for qualifying returns will be given in the form of an account credit against new purchases. **No cash refunds available**

Information Policy:

DMI works to maintain to the best of our abilities, correct and current information in our catalogs and on our websites. However data and information on our products and services can quickly become out of date without prior warning. Part numbers and box labels may change or vary from this catalog or DMI websites. The information presented is from sources believed to be reliable but no warranty (expressed or implied) is made regarding accuracy, adequacy, completeness, legality, reliability or usefulness of any of the information contained within this catalog or DMI websites.
